Summary

- Senior software engineer with 20 years of experience in software development and leading teams for edtech, legal, e-commerce, and finance companies with 25 to 2,500+ employees, and up to 9-figures in annual revenue
- Shipped applications and features delivering \$500k+ in combined revenue and cost-savings impact
- Skilled in leading/mentoring, modernizing legacy systems, and leveraging AI tools to compress project timelines
- Fluency across C#, .NET, Java, Spring, React, Next.js, TypeScript, and SQL

Skills

Languages: C#, Java, JavaScript, TypeScript, SQL, HTML5, CSS3, Python

Frameworks & Libraries: ASP.NET, Spring, React, Next.js, Node.js, Tailwind CSS, shadcn/ui

Testing & DevOps: MSTest, JUnit, Cypress, Mocha, Vitest, GitHub Actions, GitLab CI/CD, Docker

Databases & Data Access: SQL Server, PostgreSQL, SQLite, Elasticsearch, Entity Framework

Additional Tools: Git, Bash, Netlify, Vercel, Figma, GitHub Copilot, Claude Code, Cursor

Experience

Senior Software Engineer & Curriculum Developer, Tech Elevator – Remote Jan 2020 – Dec 2025

Software engineering bootcamp teaching core development principles and full-stack development for 5,000+ learners

- Architected CI/CD process in C# to automate curriculum deployment, reducing manual workload by 95%
- Developed AI-assisted workflow to generate assessment questions, delivering 8-month project in 3 months
- Created 30 REST API reference implementations in ASP.NET and Spring Boot supporting 2,000+ students
- Built 15 Docker-based automated testing pipelines standardizing environments across 70 curriculum labs

Lead Software Engineer, Traffic Safety Store – Philadelphia, PA/Remote July 2016 – Sept 2019

E-commerce platform for road and traffic safety equipment, serving contractors and municipalities nationwide

- Drove \$150k in annual revenue by replacing paginated static grids with live-filtering product search using React
- Directed 3-person team to build ASP.NET/React portal centralizing product management across 4 storefronts
- Integrated Avalara API to replace hardcoded sales tax rates and automate exemption approval process
- Replaced insecure homegrown auth with ASP.NET Identity, adding role-based access control and audit logs

Software Engineer, Dechert LLP – Philadelphia, PA Jan 2011 – July 2016

Business and litigation law firm with 900+ attorneys in 25+ offices worldwide

- Architected system to automate conflict-of-interest access controls across 5 data centers, saving 20+ hours/week
- Saved firm \$25k+ annually by building searchable internal skills database, reducing consultant spend
- Integrated Okta for SSO and automated app provisioning, eliminating requests for access and onboarding

Education

Temple University, Bachelor of Science – Philadelphia, PA

- Major: Information Science & Technology | Minor: Business Administration
